Flush-mounted bus coupler, instabus KNX/EIB 75040001 KNX bus system, other bus systems without, flush-mounting type of installation, width in modular units 0, number of sensor/actuator connections 2, screw fastening type, min. depth of device box 25mm, flush-mounted bus coupler KNX. Bus coupler flush, interface between user module and bus line. For installation in standard 58 mm switch boxes. Installation without claws, via support ring using device screws. The flush-mounted bus coupler is a KNX component in a flush-mounted housing with support ring. It represents the mechanical, electrical and data-technical interface between the user modules and the bus line. By programming with an application (software), telegrams can be generated and sent or received and evaluated. The bus coupler is dimensioned for installation in standard 58 mm flush-mounted switch boxes. It is installed using a support ring using the device screws of the switch box. A connection terminal is required to connect the bus line. The flush-mounted bus coupler is suitable for connecting user modules of all available Berker designs. User module and bus coupler must be of the same make.

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
