Quantrol compact controller AC110-240V, 96x96mm 702034/8-1000-23 Max. voltage of the contacts 240V, degree of protection (IP) IP65, color blue, the areas of application are two-point and three-point control applications and the control of control valves. The universal analogue input for resistance thermometers, thermocouples or current/voltage signals is freely programmable. Target and actual value as well as all parameters are shown on two seven-segment LED displays (red/green) with one or two decimal places. The values can be displayed either in °C or in °F. 2 relay outputs with a switching capacity of 3 A / 230 V and 1 binary input are available. The switch position of the relay or logic output, to which different functions can be assigned, is displayed via yellow LEDs. With the binary input, e.g. B. the operation and setting locked, a ramp or timer activated or self-optimization started. The supply voltage is AC 110 to 240 V. The controller has a ramp function with an adjustable gradient for constantly changing the setpoint. In addition, a special firing curve for small ceramic kilns can be used so that controlled start-up and time-dependent firing is possible. The operator can enter target values, gradient and burning time directly on the device. As an alternative to operation from the front, the controller can be programmed via the setup program and USB interface without an additional power supply.
