Radio powerline gateway for mounting rail FPLG14 radio bus system, Powernet bus system, other bus systems without, radio bidirectional, radio interface design manufacturer-specific, REG mounting type, width in modular units 2, with LED display, operating voltage 230V, other protocol, visualization, radio interface, Wireless powerline gateway. Bidirectional. Standby loss only 0.4 watts. Supply voltage: 230V. Connection to the Eltako RS485 bus. Bus cross-wiring and power supply with jumper. This gateway translates the telegrams from radio and powerline in both directions. Operation in connection with FAM14 or FTS14KS. All Powerline telegrams from the power grid are automatically translated into RS485 bus telegrams and, if necessary, also sent as radio telegrams by connected FTD14. Only wireless or RS485 bus telegrams that have been taught into the FPLG14 are translated into powerline telegrams and modulated onto the mains. Up to 120 different addresses. The teach-in takes place with rotary switches on the front or with PCT14 according to the operating instructions. Control functions of the GFVS for dimmer, heating and roller shutter control are also possible.

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
