NH fuse link NH000, In: 40 A, gG 3NA6817-6KJ Size NH000, rated current 40A, rated voltage 690V, type of voltage AC/DC, rated breaking capacity 120kA, operational class gL/gG (full-range line protection/full-range device protection), design indicator combination indicator, Insulated metal grip lugs (IMGL), NH fuse link, NH000, In: 40 A, gG, Un AC: 690 V, Un DC: 250 V, combination indicator, insulated grip lugs NH fuse system 3NA, 3ND for selective line and system protection. The LV HRC fuse system from Siemens, as an important part of the SENTRON protective components for electrical installations, offers effective personal, device and plant protection through safe shutdown in the event of an overload or short circuit. Compared to miniature circuit breakers, higher short-circuit currents can be implemented with better current limitation at the same time. The main features of the NH fuse system are: 1. Combination detectors signal that the fuse has been switched off by a clear color change from red to white. 2. More safety when changing thanks to insulated grip tabs. 3. High selectivity at low cost. 4. Long-term and safe operation due to silver-plated contact blades. 5. Fuse links from 2A to 1250A and available in sizes 000, 00, 0, 1, 2, 3, 4 and 4a. For safe, efficient electrical infrastructure in buildings and industry, Siemens offers an integrated portfolio of protection, switching, measuring and monitoring devices, distribution boards, switches and socket outlets.
