Redundancy module 20 A output current 6EP4346-7RB00-0AX0 Voltage type of the supply voltage DC, 1st output voltage 24 ... 56V, rated value of output current 1 20A, rated supply voltage at DC 12 ... 48V, design of the electrical connection spring-loaded connection, DIN rail mounting possible, suitable for series installation, Installation width 35mm, installation height 225mm, width 35mm, height 135mm, depth 125mm, degree of protection (IP) IP20, SITOP RED1200 redundancy module input/output: DC 24/48V/20 A suitable for decoupling two SITOP power supplies with a maximum output current of 10 A each The redundancy modules SITOP RED1200 are the perfect addition to any 12, 24, 48V power supply to provide additional protection against supply failure. The redundancy module decouples two 12, 24, 48 V power supplies of the same type, so that if one power supply fails, the loads can still be supplied via the second power supply. Using the redundancy modules, power supplies of the same type can also be connected in parallel to increase performance. No matter what industry, no matter what requirement -? Siemens offers reliable and efficient power supplies for every system.

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
