Busbar system 5mm 8US1921-2AC00, type of accessory/spare part=other, busbar N system, accessories busbar center distance 40, 60mm connection terminal rail thickness: 5mm 16-120 mm2 busbar system 8US for the construction of protective devices such as fuse switch disconnectors and circuit breakers - safe, space-saving, clear. The use of the Siemens 8US busbar systems offers a wide range of options for installing rail-adaptable connection, switching and installation devices. The space-saving modular design and quick-assembly contacting ensure economical electrical equipment in today's installation distribution board construction. The assembly takes place on longitudinal bars, the rail spacing is 60 mm. The Siemens 8US busbar systems are characterized above all by: 1. Mechanical fastening and electrical contacting in one operation. 2. Worldwide approval and therefore worldwide possible uses in mechanical and plant engineering. 3. Easy replacement of individual devices or entire combinations. 4. Assembly time savings and cost reduction through fully assembled consumer branches. 5. High operational safety thanks to finger-safe covers for the adapters and device carriers. 6. Wide range of usable busbars for easy adaptation to current levels of up to 1,600 A. Siemens offers a consistent portfolio of protection, switching, measuring and monitoring devices, installation distributors as well as switches and sockets for a safe, efficient electrical infrastructure in buildings and industry.
