KNX RF hand-held transmitter 2-way anth 512200 Type of accessory other, KNX RF hand-held transmitter 2-way anthracite With the KNX RF hand-held transmitters, control becomes "mobile": the desired KNX function can be conveniently controlled from any point in the house by "remote control" to be triggered. When the button is pressed, the KNX RF hand-held transmitter wirelessly transmits KNX telegrams depending on the parameter setting with the application program loaded. These can be, for example, telegrams for switching or pressing, for dimming or for controlling blinds. It is also possible to program value transmitter functions (dimming value transmitter and scene extensions). Features: Confirmation function as well as transmission and status display via 2-color LED (red green) separately for each button with 2-stage display function. Optional status display via separate 1-bit status communication objects. Transmission and confirmation display can be switched off. Project planning, commissioning and parameterization are carried out via ETS (version 5 or newer). Battery operated device. "Switching" function: Rocker or button function. Parameterizable command when pressing and releasing (ON, OFF, TOGGLE, no reaction). "Dimming" function: rocker function. Command when pressing the rocker (right and left button) parameterizable (brighter - ON, darker - OFF). "Blind" function: Rocker function. Command when pressing the rocker (right and left button) parameterizable (UP, DOWN, TOGGLE). Time between short and long-term command configurable. "Value transmitter" and "Scene extension" functions: Rocker function. Command when pressing the rocker (right and left button) parameterizable (values 0 to 255, 0 to 100% or scene number). With scene extension: memory function possible. Notes : Batteries are consumable items and must be replaced regularly. Please observe the regulations for the disposal of used batteries.
