Glass sensor with room temperature. 75642135, bus system KNX=yes, bus system KNX radio=no, bus system radio bus=no, bus system LON=no, bus system Powernet=no, other bus systems=without, radio bidirectional=no, type of installation=flush-mounted, with theft/dismantling protection=yes, With bus coupling=yes, number of actuation points=6, with LED display=yes, with labeling field=no, with display=yes, material=glass, material quality=other, surface=other, surface finish=glossy, color=black, RAL number (similar)=9005, transparent=no, with room thermostat=yes, with infrared sensor=no, degree of protection (IP)=IP20, min. depth of device box=27 mm, double glass sensor with temperature controller TS sensor configured, black. Double glass sensor with labeling, with all-round bevel, creation of individual labeling via internet configuration software, without visible fastening elements, with four control surfaces, LED display with symbols for showing the operating mode, controller disable, room outside temperature, time (timer required), with 2 additional display sensor surfaces, with a blue operating LED, with four white status LEDs, flush-mounted installation, special program. Operating element for room-related and room-spanning control of functions. For individual individual room temperature control, actuation by touching the glass plate (capacitive detection), flat design and high switching reliability thanks to the conductor tracks being applied directly to the glass plate, for installation in a special installation box for flush-mounting and hollow walls, height and side compensation for installation in a special installation box, with Adapter ring for dismantling protection and shadow gap formation. For vertical installation, with removal tool, with integrated bus coupler, bus connection via connection terminal. The scope of the display menu for operation can be parameterised. For switch, pushbutton, dimming, blinds, room temperature controller functions, value transmitter for dimming position, brightness and temperature values 1 and 2 bytes, one and two-surface operation configurable, sensor surfaces can be blocked via object, controller operating modes: comfort standby night and frost/heat protection mode. For heating and/or cooling operation with/without additional stage, control parameters for heating or cooling elements are preset. For continuous (PI) or switching (2-point) control, temperature measurement via internal and/or external connectable sensors with averaging, signaling objects for heating and cooling, with valve protection function, object for controller status, with key lock...
