ELS 70121 KNX T-APTemperature sensor KNX T-AP The temperature sensor KNX T-AP measures the temperature outside or inside. Another external temperature value can be sent to the KNX T-AP via the KNX / EIB bus and then processed by it. This enables an overall temperature value to be output (e.g. average room temperature). The proportions of the respective temperature values (measured and external value) in the total temperature can be set as a percentage. The temperature sensor makes four limit values available, which can be set either via parameters or via communication objects. The switching outputs of the limit values can be blocked via blocking objects if necessary. In addition, the KNX T-AP has an integrated PI controller that can be used to control one or two-stage heating and one-stage cooling. The configuration takes place with the KNX software ETS. Technical data Operating voltage: KNX bus voltage, current: max. 5.5 mA, max. 15 mA with active programming LED Mounting type: surface-mounted Data output: EIB / KNX +/- bus connector BCU type: own microcontroller PEI type: 0 Number of group addresses : max. 200 number of assignments: max. 200 number of communication objects: 51 Ambient temperature: -25 ° C to + 85 ° C (operation) Protection class: IP 65 Dimensions: approx. 65 mm × 93 mm × 38 mm (W × H × T) Weight: approx. 72 g Measuring range: -40 ° C to + 80 ° C Resolution: 0.1 ° C Manufacturer: Elsner Elektronik GmbH Item no .: 70121KNXT-AP

YOUR ADVANTAGES

▶ **WORLDWIDE TRADE** *Corporate video eibmarkt®*	✔ **99% CUSTOMER SATISFACTION** *> 500,000 customers worldwide*	✔ **DHL TRACK & TRACE** *Shipment tracking*
✔ **COMPLAINTS HANDLING** *Obliging and 100% safely*	✔ **25 YEARS OF EXPERIENCE** *In worldwide mail order*	✔ **ORDER LIVE CHAT** *With order history*
✔ **SHORT DELIVERY TIME** *Warehousing*	✔ **REFUND** *Within 14 days*	✔ **DATA PROTECTION** *Guarantee*
