Ratchet ring wrench. SW=8mm 11 2508 Wrench size jaw side 8mm, wrench size ring side 8mm, head width jaw side 15.8mm, head width ring side 18.3mm, head height jaw side 5mm, head height ring side 7.7mm, length 135mm, cranked, ratchet design, number of corners 12, ratchet ring and Open-end wrench for ratcheting loosening or quick tightening of screws and nuts in one go without using the ring ratchet. On one side open-end wrench with 15 degree offset, on the other side a ring spanner of the same size with built-in ratchet mechanism with special advantages: ratchet with fine teeth: 72 teeth = only 5 degrees minimum swivel angle. Left and right rotation is achieved by simply turning the key and not by means of an annoying switch lever, which often shifts unintentionally. The keys build very narrow despite the ratchet. This means that the tools can be used particularly well in confined spaces. 12-point ring with flank drive, i.e. the drive no longer takes place via the corners of the screw head but on the flanks, which means that a significantly higher power transmission is achieved and the edges of screw heads and nuts are protected Drop-forged chrome-vanadium steel, specially hardened, highly polished, nickel-plated and hard-chromed. Very high torque transmission, the DIN requirements are exceeded. 8mm

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
