If you only have to add a few inputs or outputs to your SIMATIC S7-1200 CPU, signal boards are a good alternative to signal modules. Signal boards are plugged directly onto the front of the controller (also possible with CPU 1211C) and are available as digital and analog input, output and mixed modules. A communication board with RS 485 interface is also available. Signal boards also allow the configuration to be expanded at a later date without requiring additional space in the control cabinet.
