Impulse switch 16A, 1S, 250VAC ES12DX-UC function electronic switch, mounting type DIN rail, width in modular units 1, installation depth 58mm, number of contacts as NO contact 1, number of contacts as NC contact 0, number of contacts as changeover contact 0, control voltage 1 8 ... 230V, type of control voltage 1 AC/DC, frequency of control voltage 1 50 ... 50Hz, control voltage 2 230 ... 230V, type of control voltage 2 AC, frequency of control voltage 2 50 ... 50Hz, rated switching current 16A, supply voltage 250 ... 250V, type of supply voltage AC, max. incandescent lamp load 2000W, max. fluorescent lamp load 1000VA, max. Impulse switch, stand-by consumption of only 0.1 watts. If the contact is used to control switching devices that do not switch at zero crossing themselves, (N) should not be connected, otherwise the additional closing delay will have the opposite effect. The simultaneous use of two potentials at the control inputs is not permitted. Very low switching noise. No constant power supply required, therefore no standby loss. The latest hybrid technology combines the advantages of wear-free electronic control with the high performance of special relays. Due to the use of a bistable relay, there is no coil power loss and no heating as a result, even when switched on. The relay contact can be open or closed during commissioning and is synchronized with the first actuation. The connection terminal assignment is identical to that of the electromechanical impulse switch.

YOUR ADVANTAGES

WORLDWIDE TRADE
Corporate video eibmarkt®

99% CUSTOMER SATISFACTION
> 500,000 customers worldwide

DHL TRACK & TRACE
Shipment tracking

COMPLAINTS HANDLING
Obliging and 100% safely

25 YEARS OF EXPERIENCE
In worldwide mail order

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
