Route warning tape Attention cable 250m DE-9999-6048-2 Printed text/symbols, color yellow, width 40mm, length 250m, underground installation, The 3M route warning tape is an aging and cold-resistant, particularly stretchable PEw tape for marking cables and lines. It is available as standard with the imprints Caution cables and Caution high-voltage cables. It is laid in the ground about 40 centimeters above electricity, gas or water pipes. Thanks to its extreme elasticity and striking bright yellow color, it warns construction machine operators during earthworks and thus protects cables and lines from damage. The route warning tape is colour-fast and permanently legible thanks to the crystal-clear coating over the print. In addition, it is PVC and heavy metal free, so it does not pollute the surrounding soil during its application.

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
