LV HRC fuse link G1 200A 500AC/440VDC 3NA6140 size NH1, rated current 200A, rated voltage 500V, type of voltage AC/DC, rated breaking capacity 120kA, operational class gL/gG (full-range line protection/full-range device protection), design indicator combination indicator, insulated metal grip lugs (IMGL), NH fuse link, NH1, In: 200 A, gG, Un AC: 500 V, Un DC: 440 V, combination indicator, insulated gripping lugs NH fuse system 3NA, 3ND for selective line and system protection. The LV HRC fuse system from Siemens, as an important part of the SENTRON protective components for electrical installations, offers people effective device and system protection through safe shutdown in the event of an overload or short circuit. Compared to miniature circuit breakers, higher short-circuit currents can be implemented with better current limitation at the same time. The main features of the NH fuse system are: 1. Combination detectors signal that the fuse has been switched off by a clear color change from red to white. 2. More safety when changing thanks to insulated grip tabs. 3. High selectivity at low cost. 4. Long-term and safe operation due to silver-plated contact blades. 5. Fuse links from 2A to 1250A and available in sizes 000, 00, 0, 1, 2, 3, 4 and 4a. For the safe, efficient electrical infrastructure in buildings and industry, Siemens offers an integrated portfolio of protective, switching, measuring and monitoring devices, distribution boards, switches and socket outlets.
