Interface module PT-C12 24VAC/DC The potential isolator / signal converter is used to separate analog signals in the range of 0 to 10 V DC and 0 to 20 mA DC or to convert signals from 0 to 10 V DC to 0 to 20 mA DC or 0 to 20 mA DC to 0 to 10 V DC. The input and output signals as well as the supply voltage are electrically isolated from one another. An input signal of 0 to 10 V or 0 to 20 mA can be connected to the device. Potential isolation function: With the PT-C12, the input signal 0 to 10 V is proportionally adjusted to the output signal 0 to 10 V. The PT-C12 adjusts the input signal 0 to 20 mA proportionally to the output signal 0 to 20 mA. Signal conversion function with electrical isolation: With a signal conversion from 0 to 10 V to 0 to 20 mA or 0 to 20 mA to 0 to 10 V, the converted output signal can be readjusted using the integrated spindle trimmer. In addition, a manual emergency operating level with a HAND-AUTO switch with feedback contact is integrated. The output signal 0 to 10 V or 0 to 20 mA can be set using the front potentiometer in the HAND switch position. A constant output voltage of max. 10 V DC, 5 mA is available at the 10 V terminal. The input Y is used for the LED display of the output voltage U_a . The brightness of the LED depends on the level of the output signal (bridge between U_a and Y). Alternatively, an external signal can be connected to input Y for the LED display of 0 to 10 V DC. Connection with screw terminals

YOUR ADVANTAGES

WORLDWIDE TRADE

Corporate video eibmarkt®

COMPLAINTS HANDLING

Obliging and 100% safely

SHORT DELIVERY TIME

Warehousing

99% CUSTOMER SATISFACTION

> 500,000 customers worldwide

25 YEARS OF EXPERIENCE

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
